Technical Field Services

Shanahan Engineering is principally a people business. Our Company prides itself on the ability to source highly competent and professional talent for our clients, and our internal business divisions. Our Technical Field Services team has the knowledge of what it takes to determine the right candidate for the project role, and assess a person's underlying experience and qualification. Our Company uses a broad range of smarts in sourcing its resources, and implements its own talent management program. Our Technical Field Services assignment team also has the ability to mobilise at short notice large teams of resources to various overseas project locations, in full compliance with the local laws and regulations. Today, our Company employs an international pool of managers, engineers, supervisors and workers of all nationalities and cultures.
